Here in India, we are the second largest producers of Silicone Release Papers & Films (next only to Loparex). Annually, we produce close to 2 million square metres with our 3 coating lines.

Our strength lies in our absolute focus on selection of best available base paper. Coupled with this, we lay great emphasis on consistency & evenness of silicone coatings. Thus, we produce finest quality silicone release liners.

Production Capacity : 2 Million Sq. Mtr. Per Annum

	COATING	SLITTING
SPEED	1) 120 meters / min.(2 such lines) 2) 180 meters / min.	1) Jumbo Slitter - 200 meters/min 2) Narrow Slitter 1 - 100 meters/min 3) Narrow Slitter 2 - 150 meters/min
WIDTH	Up to 1650 mm	Max: 1580 mm Min: 15 mm
OUTER DIAMETER	Up to 1200 mm	Up to 1000 mm (Jumbo width) & 600 mm (for narrow widths)
CORE	Max: 152 mm (6")	Min: 76 mm (3")

Substrates

- Paper :**
- 1) Glassine
 - 2) Clay Coated Kraft (CCK)
 - 3) Super Calendar Kraft (SCK)
 - 4) MG Kraft Paper
 - 5) Hawana Glassine Paper

Products

- Paper :**
- 1) Glassine Release Liners
 - 2) Machine Glazed Kraft (MGK)
 - 3) Release Papers
 - 4) Clay Coated Kraft (CCK) Release Papers
 - 5) Double Side Silicone Release Papers
 - 6) Differential Silicone Release Papers
 - 7) Fluoro Silicone Release Papers

- Film :**
- 1) Polyester Release Liner
 - 2) Metalize Polyester Release Liner
 - 3) Color Polyester Release Liner
 - 4) Double Side Polyester Release Liner
 - 5) Differential Polyester Release Liner
 - 6) Fluoro Silicon Polyester Release Liner (For Silicone Adhesive)

Packaging Solutions Pvt. Ltd.

Our Products are used in following application segments

- Hygiene Industry
- Pressure Sensitive Label Stock Industry
- Construction & Roofing Industry
- Fiber Composites Industry
- Hologram & Security Envelopes Industry
- Foam Industry
- Electronics Industry
- Medical Industry
- Tapes Industry
- Bakery & Confectionery Industry
- Graphic Arts Industry
- Automotive components Industry
- Rubber Industry

Thickness	Paper - 28 to 140 gsm	Films	19 to 125 microns
Curing Mechanism	Thermal	Silicone System	Solvent-less Platinum Coating

Testing Procedures

- We conduct testing's like release force, gsm, thickness, moisture & other parameters,
- Our release force testing is done on Peel Adhesion Tester; test method is FTM -10 with Tesa 7475 tape.
- Peel adhesion (180°) at 300mm per minute.

Packing Procedures

We take enough care in final product packing. Generally silicone release paper is supplied in :

1. Roll Form Packing

2. Box Packing

3. Pellet Packing

However, we shall be pleased to cater to specific packing requirements of our esteemed customers.

Transportation Facilities

As per Customer preference.

Delivery Time

15 Days after received Purchase order.
